

DESCRIPTION

Seafarers play a vital role in the lives of everyday people. Through their steadfast effort and sacrifices, seafarers deliver the food, fuel, and commodities consumed by the world. The Drew Marine CREW CARE Program was developed with the welfare of these vital seafarers in mind. The CREW CARE Program produces cleaner, safer, and healthier living spaces for the crew. Traditional cleaners can be hazardous, difficult to manage and to store in crew's living spaces, and can affect indoor air quality as traditional cleaners often emit irritating fumes and particulates. Traditional cleaners often contain harsh acids, contain components that are highly alkaline, or contain petroleum distillates, or particulates; all of which can affect seafarers in their living spaces. However, the CREW CARE Program is an innovative solution containing everything needed to ensure healthy conditions are maintained in the crew's living spaces without the use of traditional cleaners. Utilizing the latest technology in biobased chemistry, the CREW CARE Program emphasizes green cleaning. How cleaning is carried out and what is used to clean has a direct impact on indoor air quality and ultimately, the on board crew's welfare.

The CREW CARE Program includes a simple cleaning manual detailing cleaning, disinfecting, and sanitizing routines that should be implemented on board. The program also includes SDSs for the biobased products, maintenance free dispensers, and simple color-coded, number-coded reference charts for posting near dispensers. As the centerpiece to Drew Marine's CREW CARE Program, the CREW CARE QL-25 contains effective, consistent, and sustainable products that are used to clean, disinfect, or sanitize vital areas on board: Living spaces, galley, and laundry.

Regular use of the products contained in CREW CARE QL-25 and implementation of the CREW CARE Program will ensure healthy and hygienic conditions are maintained, crew contact with harsh chemicals is mitigated, waste streams are easily managed with negligible impact on the marine environment, and consumption of chemicals is controlled. The CREW CARE Program delivers a solution that protects and benefits not one, but all three vital pillars to sustainability programs, that is it has a positive impact on people, planet, and profit.

In order to prevent the spread of disease, International Health Regulations emphasize the need to establish cleaning programs onboard in order to maintain clean and sanitized living spaces/galleys. Port State review of established

FEATURES

- Consistent, green products and programs delivered fleet wide
- Simple dispensing system with refillable, ready-to-use (RTU) bottles
- Color, number, and icon coded packaging
- Simple cleaning instructions, charts, and manuals
- Recycled packaging materials
- Includes products necessary to maintain clean, hygienic living spaces

BENEFITS

- Maintains hygienic conditions in living spaces
- Protects crew against spread of disease
- Products are eco-friendly
- Controlled dosage and consumption rates
- Waste stream does not impact environment
- Cost-effective portion control
- Minimal long-term effect on the environment
- Small storage footprint and easy to store onboard
- Green cleaning/hygienic living
- Right product for right application

cleaning programs and inspection of living spaces may occur during their issuance of Ship Sanitation Certificates. Moreover, for the benefit of the crew, the Maritime Labor Convention, 2006 requires living spaces be maintained in a clean, tidy condition and requires frequent and documented inspections of living spaces. Implementation of the CREW CARE Program, coupled with use of products in CREW CARE QL-25, will ensure healthy hygienic conditions are maintained not only in accordance with regulatory requirements but will ultimately contribute to crew welfare. The CREW CARE Program is also recommended to meet sustainability initiatives.

CREW CARE QL-25 CONTENTS

CREW CARE QL-25, PCN 1AB3449, comes in one large case (154 kg) and contains individual case(s) of only the following cleaning products:

ACCOMMODATION SPACE GREEN CLEANING	PCN*
