

DESCRIPTION

FOAM BOOSTER is a concentrated, water-based foaming agent. Its concentrated water-based formula was designed to enhance the cleaning and foaming tendency of alkaline cleaners that are used for cargo hold cleaning on dry bulk carriers. When added to alkaline cleaning solutions, FOAM BOOSTER enhances the foaming tendency of the cleaner. The rich foam produced by FOAM BOOSTER increases the contact time of the cleaning solution applied to vertical cargo hold surfaces, thus improving the cleaning efficacy of the cleaning solution.

FOAM BOOSTER is MARPOL Annex V compliant.

APPLICATION & USE

Add 50 ml of FOAM BOOSTER per 10 liters cleaning solution. Follow use instructions of the selected alkaline cleaner to determine actual cleaner concentration strength.

Apply to cargo hold surfaces with chemical application equipment and foaming nozzle. Do not allow the cleaning solution to dry on surfaces. Follow up the cleaning with a fresh water rinse for better results.

TYPICAL PHYSICAL PROPERTIES

Appearance:	Clear liquid
Odor:	Mild
Density at 20°C:	1.05 ± 0.03 g/cm ³
Flash Point (PMCC):	N/A
pH:	7.0 ± 1.0

NOTE: Always wear the appropriate personal protective equipment when using this product.

PACKAGING

FOAM BOOSTER is available in 25 liter pails (PCN 110302).

IMPORTANT INFORMATION

Drew Marine maintains Safety Data Sheets on all of its products. Safety Data Sheets contain health and safety information for your development of appropriate product handling procedures to protect your employees.

Our Safety Data Sheets should be read and understood by all of your supervisory personnel and employees before using Drew Marine products.

FEATURES

- Compatible with water-based alkaline cleaners
- Concentrated, high foaming surfactants
- Water-based
- Non-flammable
- Contains no hydrocarbons
- MARPOL Annex V Compliant

BENEFITS

- Greatly improves contact time of cleaning chemicals
- Enhances overall cleaning process and cleaning results
- Maintains regulatory compliance
- Cost effective
