

DESCRIPTION

RUST REMOVER PLUS is a concentrated product, designed to remove rust stain and maintain the anticorrosive properties of the metal. It contains corrosion inhibitors that minimize the corrosion rate of the iron, thus it makes the iron more resistant to corrosion.

It also creates a rust protective film that works as a primer when top coat is applied.

APPLICATION & USE

RUST REMOVER PLUS is ideal to remove the rust from the cargo holds, especially from the tank top, while passivating the surfaces and preparing them for painting.

It is very effective for the light white stains that remain on the painted cargo hold surfaces after chemical cleanings.

The application of the chemical can be performed both by CARGO HOLD APPLICATION SET or by brooms, but it should be done by the same manner as the painting.

Prior to the application, sweep away the remaining cargo deposits or rust flakes, if any, using brushes, scrapers, compressed air etc. but avoid using any water (neither sea nor fresh water) for pre-washing the surfaces.

Apply the product with circular movements in order to help it penetrate into the surfaces pores and take under consideration the environment conditions to make sure that the surfaces are not getting dry before rinsing.

Make sure that the applied chemical solution is left to react or 10-20 minutes, depending on the environment conditions

After the application of the product is completed, the surfaces must be rinsed. Spray enough quantities of fresh water on the surfaces to remove any rust and chemical residues left from passivation reaction.

*RUST REMOVER PLUS should be used undiluted. The water used during the process, should be should be fresh water and not sea water..Persisting residues may require repeating above procedure or spot cleaning with undiluted product.

PHYSICAL PROPERTIES

| | |
|---------------------|-------------------------|
| Appearance: | Colourless liquid |
| Odor: | odourless |
| Flash Point (PMCC): | None |
| pH (undiluted): | 1.00 +/- 0.05 |
| Density at 20°C: | 1.35 Kg/cm ³ |

NOTE: Always wear the appropriate personal protective equipment when using this product.

PACKAGING

RUST REMOVER PLUS is available in 210lt drums (PCN: 120604).

IMPORTANT INFORMATION

Drew Marine maintains Safety Data Sheets on all of its products. Safety Data Sheets contain health and safety information for your development of appropriate product handling procedures to protect your employees.

Our Safety Data Sheets should be read and understood by all of your supervisory personnel and employees before using Drew Marine products.

FEATURES

- Fast removal of rust and rust stains from painted steel, brass, copper, wooden and ceramic surfaces
- Ideal to clean and passivate ferrous metal surfaces and inhibit further corrosion
- Safe to apply on all kind of surfaces including aluminum
- Solvent-free
- Non-flammable
- Comprises biodegradable surfactants

BENEFITS

- Highly concentrated
- Easy apply
- An excellent base where paint can be applied
- Passivates the surfaces
