

DESCRIPTION

Biosperse 250 is a liquid broad spectrum biocide for control of bacteria, fungi, and algae in industrial water systems such as recirculating water systems, pasteurizers, air washer systems, membrane separation systems, coatings, emulsion polymers and adhesives. Biosperse 250 provides long lasting killing effects and is recommended in systems with pH between 6-9.5.

FEATURES

- Is a broad spectrum biocide, which effectively controls spore and non-spore forming bacteria, SRB's, Fe-bacteria, algae, and fungi.
- Provides a long lasting killing effect, which enables less frequent biocide additions.

FEEDING

The quantity of Biosperse 250 required for any given application will depend on such factors as the type and volume of the system, the extent of microbiological contamination and the degree of control required.

Biosperse 250 may be fed directly from the drum or diluted with water and fed by any suitable chemical feed system. Biosperse 250 should be dosed directly into the sump or basin or any location where good distribution can be assured. Contact your Drew Marine representative for more information.

HANDLING PRECAUTIONS

Wear suitable protective gloves and safety goggles. In case of contact, immediately flush with water. After eye contact, seek medical advice. If swallowed, drink large quantities of milk, egg whites, or a gelatin solution. If these are not available, drink large quantities of water. Do not induce vomiting. Seek medical advice immediately. Small spills can be flushed with water. Large spill should be collected for disposal.

Use Biosperse 250 safely. Always read label and product information (SDS) before use.

PACKAGING

Product is available in 25-liter pails (PCN 1551408).

TYPICAL PROPERTIES

Appearance:	Clear, colorless to light yellow liquid
Odor:	Pungent
pH:	4
